BRIEF EXPLANATION OF THE CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a market basket of goods and services. CPIs are published for two population groups: 1) The CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers 32 percent of the total population, and 2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which each cover about 67 percent of the total population. While the CPI-U and CPI-W are considered final when released, the C-CPI-U is issued in preliminary form and is subject to two annual revisions. The CPI is based on prices of food, clothing, shelter, transportation, medical care, and other goods and services that people buy for day-to-day living. In calculating the index, price changes for the various items in 87 locations are averaged together with weights that represent their importance in the spending of the appropriate population group. Indexes for different months are usually compared in relative terms. Thus, an index of 133.5 is 1.063 times higher than an index of 125.6 ($133.5/125.6 = 1.063$): in

other words, prices increased 6.3 percent. The CPI is used as an indicator of inflation, a deflator of other economic series, and an escalator for income payments.

More detail. This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Consumer Price Index. The full release is available electronically on the Internet at <http://www.bls.gov/cpi/> at release time. If you have any questions about the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Room 3615 PSB, Washington, DC 20212, or call (202) 691-7000. Full detail is available in the monthly periodical *CPI Detailed Report* for \$47 per year from New Orders, Government Printing Office, P.O. Box 371964, Pittsburgh, PA 15250-7964. This information will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: 1-800-877-8339. For a recorded message of summary CPI data, call (202) 691-5200.

CPI For All Urban Consumers (CPI-U)-Analysis

3 percent in January, following two months. Energy increased 4.0 percent in January. All-items energy advanced 6.6 percent in January. Meanwhile, all-items energy decelerated

in January. The index for food declined 0.2 percent, following increases of 0.2 percent in each of the preceding two months. The index for all items less food and energy, which increased 0.2 percent in December, rose 0.1 percent in January. A smaller increase in the index for medical care, coupled with declines in the indexes for apparel and public transportation, accounted for the smaller advance in January.
